Client API Guidelines

> This document shows the outline of the Client API.
>
> It describes for each endpoint what you can do with it and all their possible parameters, requests and responses.

Introduction

Client API supports FLYERALARM's goal of offering the broadest product portfolio possible, while ensuring scalability and efficiency.

The Client API model achieves the following benefits:

- Easy REST API implementation
- Automated order placement
- Full access to the FLYERALARM product catalog
- Print data check for your convenience
- Neutral shipping for your customers
- Proactive updates about the orders

It is also possible to benefit from the Client API features by the "manual" order placement, as you have the opportunity to use only the UI as a service of the Client API, called StartNOW V3.

Currently, the following delivery countries are available to place an order to through the Client API.

- Germany (DE)
- Austria (AT)
- Belgium (BE)
- Switzerland (CH)
- Denmark (DK)
- Spain (ES)
- France (FR)
- Italy (IT)
- Netherlands (NL)
- Sweden (SE)
- United Kingdom (UK)
- Portugal (PT)
- Croatia (HR)
- Romania (RO)
- Luxembourg (LU)
- Ireland (IE)
- Hungary (HU)
- Czech Republic
- Poland
- Slovakia

Authentication

The Client API authentication is proceed via the token, which is your individual access for the Client API usage and the execution of the API endpoints. The mentioned tokens are granted per desired delivery country separately and are based on the webshop account registered for order placed only via the Client API and its StartNOW V3. This means that email address used for the Client API/StartNOW V3 account(s) creation can't be used for any other orders placement (e.g., via FA webshop).

Depending on your current phase and needs, two tokens are available for your usage: demo and live.

The demo token provides our customers with the opportunity to get familiar with the Client API and do the necessary testing. Meanwhile, the live tokens are already used for the live “real” orders placed via the Client API. Both tokens function in the same live environment of the Client API.

The only difference between the demo and live tokens is the payment method, as the demo token has the default prepayment method to avoid any test orders accidentally going to production. So, it is not allowed to pay for test order with the mentioned prepayment method, as the demo token is used only for the testing phase and orders that should not be produced.

The tokens are valid for 12 months, regardless of their type, and are automatically renewed and send to you 2 weeks before the expiration date of the previous tokens.

Endpoints

You can test all endpoints on the OpenAPI documentation: FLYERALARM - Client API

All endpoints are described below with the necessary details to take into account.

> FLYERALARM is currently switching the product catalogue to a new product data model with more advanced and broader variety of products to choose from. This also means that the current products will be gradually migrated to the “new world”.
>
> Since we analyze all steps very carefully for the best experience and results, **there is no specific timeline when all products will be shifted**.
>
> For now, only few product groups are switched to the new data model, and we still provide the “old” product groups with old variant IDs, which are orderable without any issues.
>
> However, you can already see some endpoints with a certain field called “catalog_type”, where you can select and filter the necessary product catalog type from the according dropdown menu included (e.g., *GET/{country}/v2/catalog/groups)*.

🗒️ PRODUCT CATALOG

Get all groups

Purpose

Returning all orderable product groups based on country. You are able to filter the retrieved information by the following categories:

- orderable or non-orderable product groups: set up to “orderable” by default
- “simple” product groups (with one product variant): set up to “all products” by default
- catalog type (old or new): set up to “old” by default
- time range for the Go LIVE date
- time range for the last change date
- pagination number

GET /{country}/v2/catalog/groups

Example

Request URL

```
https://rest.flyeralarm-esolutions.com/{country}/v2/catalog/groups
```

Request body

This request does not have a body

Response

```
{
  "data": [
    {
      "id": 0,
      "replaced_by": "string",
      "name": "string",
      "description": "string",
      "description_html": "string",
      "categories": [
        {
          "id": 0,
          "name": "string"
        }
      ],
      "type": "standard",
      "image": "string",
      "simple_product": true,
      "version": "string",
      "history": {
        "go_live_date": "string",
        "last_change_date": "string"
      },
      "has_variants": true,
      "new_catalog": true,
      "has_quantities": true,
    }
  ],
  "meta": {
    "previous": 0,
    "next": 0,
    "limit": 0,
    "total": 0,
    "filters": {}
  }
}
```

Particularly the following nodes can be helpful to track the presence of any updates in the product:

- “history” node:
  - “go_live_date” - date and time when a product group first becomes orderable on API. The date does not change when the product is re-activated after de-activation. You can use it to display a product as new in your front end or to know whether you have to integrate new products.
  - “last_change_date” - date and time when product group data last changed (any of the properties). Deactivation and reactivation of a product also cause an update of this property. The changes in the datasheets are not visible in the last_change_date.

```
  "history": {
        "go_live_date": "string",
        "last_change_date": "string"
      },
```

- “hash value” node: any changes in the value mentioned below reflects the presence of the product changes. The exact changes should be reviewed separately.

```
  "version": "60860b3ab78b24c979a3cf9b10760d9e44173861"
```

Get group details

Purpose

Returning a detailed description of a Product Group, without the data about the variants.

GET /{country}/v2/catalog/groups/{product_group_id}

Example

Request URL

```
https://rest.flyeralarm-esolutions.com/{country}/v2/catalog/groups/{product_group_id}
```

Request body

This request does not have a body

Response

```
{
  "id": 5756,
  "name": "Flyers",
  "description": "Description of the product",
  "description_html": "<p>Description of the product</p>",
  "categories": [
    {
      "id": 1,
      "name": "Print Product"
    }
  ],
  "image": "https://cdn.flyeralarm.com/products/random.jpg",
  "type": "standard",
  "has_variants": true,
  "history": {
    "go_live_date": "2024-01-01 00:00:00",
    "last_change_date": "2024-01-01 00:00:00"
  },
  "new_catalog": false,
  "version": "60860b3ab78b24c979a3cf9b10760d9e44173861"
}
```

Get all variants of a group

Purpose

Returning a paginated list of variants based on the product group id. It is possible to attach the quantities node for each variant by adding the corresponding parameter. By default the node is not included.

GET /{country}/v2/catalog/groups/{product_group_id}/variants

Example

Request

```
https://rest.flyeralarm-esolutions.com/de/v2/catalog/groups/5756/variants?with_quantities=true&page=10
```

Request body

This request does not have a body

Response

```
{
  "data": [
    {
      "id": 636827,
      "group_id": 5756,
      "data_sheet":
 "https://www.flyeralarm.com/sheets/de/flyer_qxl_mass.pdf",
```

```
      "data_sheet_wl": "https://www.flyeralarm.com/sheets/de_wl/flyer_qxl_mass.pdf",
      "print_data_upload_required": true,
      "quantities": [
        {
          "id": 18554863,
          "quantity": 10,
          "shippings": [
            {
              "type": "Standard",
              "from": 4,
              "to": 4,
              "deadline": "12:00",
              "price": 11.12,
              "msrp_price": 15.89
            },
            {
              "type": "Express",
              "from": 2,
              "to": 2,
              "deadline": "12:00",
              "price": 21.27,
              "msrp_price": 30.39
            }
          ],

```

The following properties for each quantity are included in case of the corresponding parameter:

- "has_shipping": true
- "weight": 145.38
- "estimatedNumberOfPackages": 9
- "isDigitalPrint": true
- "currencySymbol": "€"
- "vat": 19

Shipping-related attributes are grouped in an array called “shippings”, showing the available shipping types for that quantity.

The field “price” shows the price for the customer based on the agreed customer type (consequently authorising token). Meanwhile, the field "msrp_price" shows the price for the FLYERALARM webshop for the corresponding country.

```
  {
          "id": 39468292,
          "quantity": 50,
          "shippings": [

      "with_quantities": true
    }
  }
}
```

The Client API provides the white label datasheets for many products, and the according team is constantly working on expanding the availability of neutral datasheets. The datasheet availability will need to be checked for the certain product accordingly.

You can recognise the path for the white label datasheets by the '_wl'. If no neutral data sheet is - yet - available for the product, the path is displayed as 'null'.

Configure a product

Purpose

Returning all possible attribute values for a given product group and total count of variations. Can be filtered/narrowed down by selecting attributes. If only 1 possible variant is left, the response will contain the Variant Id in the response.

POST /{country}/v2/catalog/groups/{product_group_id}/configurator

Example

Request URL

```
https://rest.flyeralarm-esolutions.com/de/v2/catalog/groups/5756/configurator
```

Request body

```
{
  "attributeNameId1": "attributeValueId1",
  "attributeNameId2": "attributeValueId2"
}
```

Response

```

  }
}
```

> The attributes of the variants will also have new IDs with the new product catalog, and everything necessary for the product configuration will be shown as a product attribute.
>
> Meanwhile, additional paying services such as the professional data check and the CO2 offset will still be treated as options that can be added to a product when ordering it.

Get the product variant details with amounts

Purpose

Returning a detailed description of a Product Variant with its quantity IDs. The information on the white label datasheets is also provided as described in the information box above.

GET /{country}/v2/catalog/variants/{variant_id}

Example

Request URL

```
https://rest.flyeralarm-esolutions.com/de/v2/catalog/variants/130331
```

Request body

This request does not have a body

Response

```

```

The information from the variant level includes the following propery:

`"print_data_upload_required": true`

The properties for each quantity mentioned earlier are included also here:

- "has_shipping": true
- "weight": 0.017
- "estimatedNumberOfPackages": 1
- "isDigitalPrint": false
- "currencySymbol": "€"
- "vat": 19

Shipping-related attributes are grouped in an array called “shippings”, showing the available shipping types for that quantity.

The field “price” shows the price for the customer based on the agreed customer type (consequently authorising token). Meanwhile, the field "msrp_price" shows the price for the FLYERALARM webshop for the corresponding country.

Find a Variant with a Quantity ID (Option 1)

Purpose

Returning a detailed description of a Product Variant based on the Quantity ID. The retrived information corresponds to the content received by `/{country}/v2/catalog/variants/{variant_id}.`

The purpose of the endpoint is the opportunity for the user to get the necessary information via different indicators: variant ID, quantity ID, or variant ID + amount (depending on the preference).

All points mentioned for the according endpoint relate also here.

GET /{country}/v2/catalog/variants/quantity/{quantity_id}

Example

Request

```
https://rest.flyeralarm-esolutions.com/de/v2/catalog/variants/quantity/9693672
```

Request body

This request does not have a body. The retrieved information corresponds to the endpoint before.

Response

```

}
```

Find a Variant with a Variant ID + amount (Option 2)

Purpose

Returning a detailed description of a Product Variant based on the Variant ID + amount instead of the Quantity ID mentioned above. The retrived information corresponds to the content received by `/{country}/v2/catalog/variants/{variant_id}.`

The purpose of the endpoint is the opportunity for the user to get the necessary information via different indicators: variant ID, quantity ID, or variant ID + amount (depending on the preference).

All points mentioned for the according endpoint relate also here.

GET /{country}/v2/catalog/variants//{variant_id}/amount/{amount}

Example

Request

```
https://rest.flyeralarm-esolutions.com/de/v2/catalog/variants/130331/amount/10
```

Request body

This request does not have a body.

Response

Exactly the same as the response from the endpoint with the Quantity ID.

> We provide you with a solution to check if a product was already migrated, and whether the corresponding ID from the “new world” already exists.
>
> The IDs and SG-IDs represent the numbers/IDs of the certain product from “old world” and upcoming “new world” accordingly. *For example, you can start checking out bonus cards (old ID: 6009, new ID: SG-525038).*
>
> Both the current and upcoming product group/variant IDs will be available for a certain period of time in the Client API to allow our customers to adopt to the new ID formats with enough time.
>
> There is not always a one-to-one match between the variants of the product with the new model and the old products, as there could be more variants.

Convert Product Catalog IDs between the catalogs

Purpose

Particularly relevant for the old and new product catalogs discussed earlier. The endpoint serves as a mapping tool, helping the Client API users to find the new catalog ID corresponding to the old catalog ID and viceversa.

The following ID types are available for the conversion:

1. Product Group ID
2. Product Variant ID
3. Product Quantity ID

The user also needs to provide the exact ID to be converted, mentioning the necessary product catalog.

GET /{country}/v2/catalog/variants/quantity/{quantity_id}

Example

Request

```
https://rest.flyeralarm-esolutions.com/de/v2/catalog/convert
```

Request body

This request does not have a body.

Response

```
{
  "SG-525038": [
    6009
  ]
}
```

PRODUCT - CUSTOM SIZES

Get Custom size product prices for a specific quantity (Option 1)

Purpose

Getting Custom Size product prices with the Variant ID + amount based on width and height.

POST/{country}/v2/catalog/variants/{custom_size_variant_id}/prices

Example

Request

```
https://rest.flyeralarm-esolutions.com/de/v2/catalog/variants/253205/amount/10/prices
```

Response body

```
{
  "width": 150,
  "height": 150
}
```

Response

```
{
  "currency": "EUR",
  "currencySymbol": "€",
  "quantities": [
    {
      "quantity": 10,
      "id": 9388480,
      "weight": 0.03375,
      "shippings": [
        {
          "type": "standard",
          "price": 12.64,
          "msrp_price": 13.31,
          "vat": 2.27
        }
      ]
    }
  ]
}
```

Get Custom size product prices for a specific quantity (Option 2)

Purpose

Getting Custom Size product prices with the Quantity ID based on width and height.

POST/{country}/v2/catalog/variants/{custom_size_variant_id}/prices

Example

Request

`https://rest.flyeralarm-esolutions.com/de/v2/catalog/quantity/9388481/prices`

Response body

```
{
  "width": 150,
  "height": 150
}
```

Response

```
{
  "currency": "EUR",
  "currencySymbol": "€",
  "quantities": [
    {
      "quantity": 11,
      "id": 9388481,
      "weight": 0.037125,
      "shippings": [
        {
          "type": "standard",
          "price": 13.37,
          "msrp_price": 14.07,
          "vat": 2.4
        }
      ]
    }
  ]
}
```

Get Custom size product prices for all available quantities

Purpose

Getting Custom Size product prices for all available amounts of the variant ID based on width and height.

POST/{country}/v2/catalog/variants/{custom_size_variant_id}/prices

Example

Request

`https://rest.flyeralarm-esolutions.com/de/v2/catalog/variants/253205/prices`

Response body

```
{
  "width": 1000,
  "height": 1000
}
```

Response

```

PRODUCT - OPTIONS

Get product options with a quantity ID (Option 1)

Purpose

Getting Product Options for the desired shipping type based on the Quantity ID.

These options can be passed when ordering a quantity.

GET/{country}/v2/catalog/quantities/{quantity_id}/shipping/{shipping_type_id}

Example

Request

`https://rest.flyeralarm-esolutions.com/de/v2/catalog/quantities/9388481/shipping/standard`

Request body

This request does not have a body.

Response

```
{
  "3": {
    "name": "Datencheck",
    "options": {
      "3001": {
        "name": "Basis-Datencheck",
        "description": "Datencheck: Basis-Datencheck",
        "bruttoPrice": "0 €",
        "rawBruttoPrice": 0,
        "nettoPrice": "0 €",
        "rawNettoPrice": 0,
        "msrpRawNettoPrice": 0,
        "msrpNettoPrice": "0 €",
        "msrpRawBruttoPrice": 0,
        "msrpBruttoPrice": "0 €"
      },
      "3002": {
        "name": "Profi-Datencheck",
        "description": "Datencheck: Profi-Datencheck",
        "bruttoPrice": "5.95 €",
        "rawBruttoPrice": 5.95,
        "nettoPrice": "5 €",
        "rawNettoPrice": 5,
        "msrpRawNettoPrice": 5,
        "msrpNettoPrice": "5 €",
        "msrpRawBruttoPrice": 5.95,
        "msrpBruttoPrice": "5.95 €"
      }
    }
  }
}

```

Get product options with a variant ID + amount (Option 2)

Purpose

Getting Product Options for specific Variant ID, by providing the amount and shipping type in the request body. These options can be passed when ordering a quantity.

POST/{country}/v2/catalog/options/variant/{new_variant_id}/amount/{amount}/shipping/{shipping_type_id}

Example

Request

`https://rest.flyeralarm-esolutions.com/de/v2/catalog/options/variant/130331/amount/10/shipping/standard`

Request body

This request does not have a body.

Response

```
{
  "3": {
    "name": "Datencheck",
    "options": {
      "3001": {
        "name": "Basis-Datencheck",
```

```
        "description": "Datencheck: Basis-Datencheck",
        "bruttoPrice": "0 €",
        "rawBruttoPrice": 0,
        "nettoPrice": "0 €",
        "rawNettoPrice": 0,
        "msrpRawNettoPrice": 0,

```

PRODUCT - PRINT DATA

Get the allowed format for a variant

Purpose

Returning information about what type of files and formats can be uploaded for a specific product variant, even before placing the order.

Note: Since the order may not be placed yet, the provided information can have a more generic focus compared with the alternative endpoint based on order ID (described below).

GET /{country}/v2/catalog/variants/{variant_id}/print_data/allowed_format

Example

Request

`https://rest.flyeralarm-esolutions.com/de/v2/catalog/variants/130331/print_data/allowed_format`

Request body

This request does not have a body

Response

```
{
  "status": true,
  "singleUploadMessage": "Single upload is available in PDF format. Example 1 with front and back printing: a product like bundled business cards needs a PDF with 2 pages. Example 2 with front and empty back pages: a product like bundled business cards needs 2 pages, empty pages must be blank and not be omitted.",
  "multiUploadMessage": "Multiple files may be bundled into a ZIP archive. The archive may contain TIFF, PDF, JPEG files. Files from the archive must follow this format: 4 digits plus file extension. Example 1 with front and back printing: a product like bundled business cards needs 4 files for upload: 0001.pdf, 0002.jpeg, 0003.tif, 0004.tiff. Example 2 with front and empty back pages: a product like bundled business cards needs 4 files for upload: 0001.pdf, 0002, 0003.tif, 0004.jpg. Notice that file number 2 is an empty file without extension."
}
```

🛒 ORDER

These endpoints allow to submit an order, update order data after submission and retrieve a list of submitted orders.

Get Order List

Purpose

Providing a paginated list of orders based on the token.

The following parameters to filter and nerrow down the order list are available:

- Order ID
- Order Reference
- Product Type
- Product Group Name
- Product Group/Variant ID
- Shipment Type
- Price Range
- Creation Date Range
- Order Status

GET /{country}/v2/orders

Example

Request

`https://rest.flyeralarm-esolutions.com/de/v2/orders`

Request body

This request does not have a body

Response

```

Order Placement

Purpose

Placing an order via the Client API. Various order samples for the most common order types are provided in the documentation, including the required fields based on the customer/order/product type. The following samples are mentioned below:

- Atomic Order
- Simple Order
- Extended Order (including also the sender's address field)
- Order with quantity specific options
- Order with multiple delivery addresses
- Order with numbering Option
- Order with custom sizes
- Order with textile sizes
- Order with Quantity ID or Variant ID + amount

Few countries require additional information to be provided for the invoicing based on the local lawys and regulations. The Client API provides order samples also for the mentioned countries.

- Country Italy (IT)
  - `customer_type` is mandatory - possible values (1 for 'private', 2 for 'individualBusiness', 3 for 'company', 4 for 'association')

- `tax_number` is mandatory
- `vat_number` is mandatory
- `recipient_code` is mandatory

- Country Spain (ES)
  - `customer_type` is mandatory - possible values (1 for 'private', 3 for 'company')
  - `tax_number` is mandatory
- Country Belgium (BE)
  - `customer_type` is mandatory (for companies)
  - `vat_number` is mandatory (must contain: BE0 + 9 numbers)

POST /{country}/v2/orders - Places an order

Example

Request

`https://rest.flyeralarm-esolutions.com/de/v2/orders`

Request body

Atomic form is provided as an example

```
{
  "quantity_id": "8309386",
  "shipping_type": "standard",
  "payment": "prepayment",
  "reference_text": "ORD-123456789",
  "addresses": {
    "delivery": {
      "first_name": "Max",
      "last_name": "Musterfrau",
      "address": "Alfred-Nobel-Straße 18",
      "postcode": "97080",
      "city": "Würzburg",
      "phone_1": "+49 123 456789"
    },
    "invoice": {
      "first_name": "Max",
      "last_name": "Musterfrau",
      "address": "Alfred-Nobel-Straße 18",
      "postcode": "97080",
      "city": "Würzburg",
      "phone_1": "+49 123 456789"
    }
  }
}
```

Address Change

Purpose

Changing any of the addresses (sender, delivery, invoice) of an Order.

The addresses of an order can be changed only before the order status is “SHIPPING”.

POST /{country}/v2/orders/{order_id}/address_change

Example

Request

`https://rest.flyeralarm-esolutions.com/de/v2/orders/DE243636871/address_change`

Request body

This request does not have a body

Response

```
{
  "message": "Address was changed"
}
```

Order's Current Status

Purpose

Returning the status of an order and shipment details based on the order ID.

GET /{country}/v2/orders/{order_id}/status_info

Example

Request

`https://rest.flyeralarm-esolutions.com/de/v2/orders/DE251677744/status_info`

Request body

This request does not have a body

Response

```
{
  "order_id": "DE251677744",
  "order_status_id": 10,
  "order_status": "Order accepted",
  "quick_uploader": "https://www.flyeralarm.com/de/uploader/quick/ef08bcfd0ad1f52d18f5df96382c0ef873fdc0010f9281ff3a083c0cc21d0fc9",
  "print_data_overview": "https://www.flyeralarm.com/de/print-data-acquisition/print-data-overview/ef08bcfd0ad1f52d18f5df96382c0ef873fdc0010f9281ff3a083c0cc21d0fc9",
  "dispatch_date": {
    "from": "2025-06-18T00:00:00+02:00",
    "to": "2025-06-18T23:59:59+02:00"
  }
}
```

Order Statuses List

Purpose

Retrieves the list of possible order statuses based on its current stage.

GET /{country}/v2/orders/{order_id}/status_info

Example

Request

`https://rest.flyeralarm-esolutions.com/de/v2/orders/statuses`

Request body

This request does not have a body

Response

```
[
  {
    "id": 10,
    "name": "Order accepted"
  },
  {
    "id": 12,
    "name": "Printing data accepted"
  },
  {
    "id": 13,
```

```
    "name": "In Production"
  },
  {
    "id": 14,
    "name": "Shipping"
  },
  {
    "id": 21,
    "name": "Printing data missing"
  },
  {
    "id": 22,
    "name": "Printing data invalid"
  },
  {
    "id": 30,
    "name": "Print data uploaded"
  },
  {
    "id": 31,
    "name": "Data check in progress"
  },
  {
    "id": 42,
    "name": "Contact support"
  },
  {
    "id": 50,
    "name": "Payment pending"
  },
  {
    "id": 51,
    "name": "Payment accepted"
  },
  {
    "id": 70,
    "name": "Print approval missing"
  },
  {
    "id": 71,
    "name": "Print approval given"
  },
  {
    "id": 90,
    "name": "Order canceled"
  },
  {
    "id": 91,
    "name": "Refunded"
  }
]
```

Order Cancelation

Purpose

Cancelling an Order based on the order ID.

It is possible to cancel the order can be cancelled before its status is “IN_PRODUCTION”.

POST /{country}/v2/orders/{order_id}/cancel

Example

Request

`https://rest.flyeralarm-esolutions.com/de/v2/orders/DE251677744/cancel`

Request body

This request does not have a body

Response

```
{
  "message": "Order was cancelled"
}
```

```
```

Invoice Email Address Change

Purpose

Changes the email address of the invoice for an existing order baesd on the Order ID.

POST /{country}/v2/orders/{order_id}/address_change

Example

Request

`https://rest.flyeralarm-esolutions.com/de/v2/orders/DE251677744/invoice/email`

Request body

This request does not have a body

Response

```
{
  "message": "Address was changed"
}
```

📸 PRINT DATA UPLOAD

Upload print data

Purpose

Attaching/uploading the print data given as [file/ftp url/http url] to a new order. The inclusion option can be chosen from the provided drop down menu.

POST /{country}/v2/orders/{order_id}/print_data

Example

Request

`https://rest.flyeralarm-esolutions.com/de/v2/orders/DE990091254/print_data`

Request body

```
{
  "print_data_url": "https://flyeralarm.com/test.pdf"
}
```

Response

```
{
  "message": "Data Received. Scheduled for upload and validation."
}
```

Get print data status

Purpose

Returning the status of the uploaded print data based on the order ID.

GET /{country}/v2/orders/{order_id}/print_data/status

Example

Request

`https://rest.flyeralarm-esolutions.com/de/v2/orders/DE990091254/print_data/status`

Request body

This request does not have a body

Response

```
{
  "order_upload_status": "Upload failed",
  "reasons": [
    "Page 1: Number of pages is incorrect. The number of pages in the uploaded file does not match the number of pages in the product ordered. Please check that you have ordered the correct product and/or that you have sent the correct file.",
    "Page 1: Incorrect file format. The data format of your file is different to the required data format. The required file format (incl. bleed margin) can be found on the data sheet. Adapt your print file accordingly. Download the data sheet for your product and read the relevant information. Please note the following information: If applicable, please also take into account the alignment of the file format (vertical or horizontal). Do not create any folding, cutting, or registration marks in the print file."
  ]
}
```

Get an order print data allowed format

Purpose

Returning information about what type of files and formats can be uploaded for a specific order.

Since the check is done based on the specific order, the retrieved information may be more precise than the endpoint based on the product variant ID described earlier.

GET /{country}/v2/orders/{order_id}/print_data

Example

Request

`https://rest.flyeralarm-esolutions.com/de/v2/orders/DE242412559/print_data/allowed_format`

Request body

This request does not have a body

Response

```
{
  "status": true,
  "singleUploadMessage": "Single upload is available in PDF format. The PDF must contain 2 pages. Example 1 with front and back printing: a product like bundled business cards needs a PDF with 2 pages. Example 2 with front and empty back pages: a product like bundled business cards needs 2 pages, empty pages must be blank and not be omitted.",
  "numberOfPages": 2,
  "multiUploadMessage": "Multiple files may be bundled into a ZIP archive. The archive may contain PDF, JPEG or TIFF files, and exactly 2 files. Files from the archive must follow this format: 4 digits plus file extension. Example 1 with front and back printing: a product like bundled business cards needs 4 files for upload: 0001.pdf, 0002.jpeg, 0003.tif, 0004.tiff. Example 2 with front and empty back pages: a product like bundled business cards needs 4 files for upload: 0001.pdf, 0002, 0003.tif, 0004.jpg. Notice that file number 2 is an empty file without extension.",
  "numberOfFiles": 2
}
```

🔎 PRE-ORDER DATA CHECK

Check print data based on product

Purpose

Creating a print data check for a given Quantity ID OR Variant ID + amount in order to validate if printing is possible. This operation must be done before submitting an order.

POST /{country}/v2/orders/check_print_data

Request

`https://rest.flyeralarm-esolutions.com/de/v2/orders/check_print_data`

Request body

```
{
  "quantity_id": "123123123",
  "print_data_url": "https://flyeralarm.com/test.pdf"
}
```

Response

```
{
  "data_check_id": "rGRQ06kvjJqD"
}
```

Get print data check status

Purpose

Returning the status of the uploaded print data for checking based on the data check ID received with the previous endpoint.

GET /{country}/v2/orders/print_data_checks/{print_data_check_id}

Request

`https://rest.flyeralarm-esolutions.com/de/v2/orders/print_data_checks/rGRQ06kvjJqD`

Response

```
{
  "order_status_id": 2,
  "order_status": "Data rejected",
  "reasons": [
    "Page 1: Incorrect file format. The data format of your file is different to the required data format. The required file format (incl. bleed margin) can be found on the data sheet. Adapt your print file accordingly. Download the data sheet for your product and read the relevant information. Please note the following information: If applicable, please also take into account the alignment of the file format (vertical or horizontal). Do not create any folding, cutting, or registration marks in the print file.",
    "Page 1: Number of pages is incorrect. The number of pages in the uploaded file does not match the number of pages in the product ordered. Please check that you have ordered the correct product and/or that you have sent the correct file."
  ]
}
```

📦 DELIVERY NOTES

Download delivery note

Purpose

Downloading delivery note to an existing order.

GET /{country}/v2/orders/{order_id}/delivery_note

Request

`https://rest.flyeralarm-esolutions.com/de/v2/orders/DE242412559/delivery_note`

Response

```
{
  "code": 404,
  "error": "Shipment with reference number \"DE242412559X01\" does not have a packing list"
}
```

Upload delivery note

Purpose

Attaching a delivery note to an existing order. (INFO: A custom delivery note can only be uploaded within the first 10 minutes after order creation. Delivery notes uploaded after this timeframe will be disregarded).

POST /{country}/v2/orders/{order_id}/delivery_note

Request

`https://rest.flyeralarm-esolutions.com/de/v2/orders/DE242412559/delivery_note`

Request body

```
{
  "delivery_note_url": "https://flyeralarm.com/test.pdf"
}
```

Response

```
{
  "message": "Data Received"
}
```

> There is a separate information sheet included in the onboarding package to get all the relevant details on the context and goal of the webhooks.
