StartNOW V3 FAQ Document

Get to know the StartNOW V3

What are the benefits of the StartNOW V3?

StartNOW V3 is the user-friendly and flexible UI as a service of the Client API designed by FA Pro. With the StartNOW V3 you have the chance to benefit from the following features:

- Manual order placement without the implementation of the Client API itself
- Easy placement of repetitive orders with “Order Again” button
- Review of the orders already placed via the system
- Manual cancelation the placed order
- Manual change of the necessary address
- Access to the shipping links of the placed orders

Which delivery countries are available through the StartNOW V3?

Currently, the following delivery countries are available to place an order to through the Client API.

- Germany (DE)
- Austria (AT)
- Belgium (BE)
- Switzerland (CH)
- Denmark (DK)
- Spain (ES)
- France (FR)
- Italy (IT)
- Netherlands (NL)
- Sweden (SE)
- United Kingdom (UK)
- Portugal (PT)
- Croatia (HR)
- Romania (RO)
- Luxembourg (LU)
- Ireland (IE)
- Hungary (HU)
- Czech Republic
- Poland
- Slovakia

Furthermore, the range of the delivery countries is constantly getting expanded and updated.

What is the frequency of the product catalogue update available through the StartNOW V3?

The system updates the product catalogue three times a week. It usually includes details on the product data itself such as product type, quantity or shipping time changes.

Whom should I ask for assistance in case of questions or technical issues during the StartNOW V3 usage?

You are welcome to raise a ticket through the ServiceNOW section available in the StartNOW V3 or contact us via service@flyeralarm.pro.

StartNOW V3 and its Onboarding Process

What do I need to do to get an access to the StartNOW V3 portal?

You need to register a new webshop account for the requested country, which must be used only for orders placed via the StartNOW V3 or its Client API.

Our team will be happy to grant you the access for the preferred delivery country as soon as we receive your request and webshop account email via service@flyeralarm.pro.

How can I create a webshop account to have an access to the StartNOW V3?

You need only an email address never used before for any Flyeralarm webshop account creation.

Afterwards, feel free to contact us via service@flyeralarm.pro, and our team will guide you through the process, depending on the desired country and other details.

Please note, that the mentioned webshop account (and its email address) must always be used only for their orders placed through StartNOWV3 or its Client API.

I have registered the new webshop account for the StartNOW V3. What's next?

You will receive from us the access package with all relevant details and information within the next 1-3 working days.

Afterwards, you just need to choose the country on our StartNOW V3 login page and enter your credentials (email address + password), as you would to log into the country webshop. You can log in across almost all countries using the same credentials

I see the message "Access Restricted" after the registration of my webshop account. Did I do something wrong?

Most probably, you see the message "Access Restricted", as we haven't set up the necessary settings and granted you the access yet. Please contact service@flyeralarm.pro, and our team will be happy to guide you through the next steps and grant the according access.

Migration to StartNOW V3: *relevant only for StartNOW V2 users*

What is the difference between the StartNOW V2 and StartNOW V3?

The StartNOW V3 is the new and improved UI version of the previous StartNOW V2 and its Reseller API.

At some point of time, the old version of the StartNOW will not be maintained anymore. Thus, we organize and support as smoothly as possible the migration process to the StartNOW V3 for all our resellers.

The new system not only provides with the same experience and features as StartNOW V2, but also grants more opportunities, including:

- Improvements and new features development only for the new system
- Even safer and more efficient system for the long-term development
- Development aligned with the Flyeralarm new catalogue

Feel free to contact us via service@flyeralarm.pro, and our team will assist you with any open question.

How does the overall StartNOW V3 migration process look like? What are the main steps to take?

The initial granting process looks exactly the same as described in the "StartNOW V3 and its Onboarding Process" section.

You can start using StartNOW V3 as soon as you get the access to it. You will have the opportunity to migrate your order history and/or address book from the previous StartNOW V2 account(s).

As soon as you confirm the successful migration, we will deactivate the previous StartNOW V2 account(s).

Can I use my usernames from the previous StartNOW V2 account(s) to access StartNOW V3?

For StartNOW V3, you need the email address and password set up during the webshop account registration. You are free to change your password whenever you prefer.

Is it possible to see my orders placed previously via the Reseller API and/or StartNOW V2 after the migration to the Client API and/or StartNOW V3?

Yes, we provide the opportunity to migrate also the order history and/or the address book for the last 365 days. Please note that the data switch is done only once after the full migration to the Client API with your explicit confirmation before the final deactivation of the previous StartNOW V2 accounts.

How the order history and/or address book migration to the Client API/StartNOW V3 works?

After the switch to the Client API/StartNOW V3, we will wait until all orders placed earlier via the Reseller API/StartNOW V2 have at least the status “In Production” to proceed with the migration.

Meanwhile, you can freely use the Client API/StartNOW V3, and we will parallelly migrate the necessary data, which will be archived for the new accounts in case of need. After the migration, we will already deactivate the previous Reseller API/StartNOW V2 accounts.

During the process, it will be essential not to make any new orders via the Reseller API/StartNOW V2, so we can make the migration once.

Deep Dive into Details

I have noticed that for some products the attribute range is much wider on the Flyeralarm webshop compared with the StartNOW V3. Will the additional options be added to the StartNOW V3 later or is the product range just smaller there?

FLYERALARM is currently switching the product catalogue to a new product data model with more advanced and broader variety of products to choose from. It leads to the current amount difference for the attributes between the FLYERALARM webshop and the StartNOW V3.

However, the StartNOW V3 system is also gradually adapting the new data model to present the new products as soon as possible.

Is there a timeline for the new product catalogue to be fully available on the StartNOW V3?

The switch to the new world itself is done very gradually to evaluate carefully all potential factors and changes. So, we will have to get back to you additionally on the approximate timeline on a later point of time.

Is there a file size limitation to be uploaded to the StartNOW V3?

The file size limit for the StartNOW V3 is 1GB for the print data upload.

Once an order is placed and files are uploaded, how much time do I have to cancel the order?

Since the print data check after the uploading process is very fast, it can go into production in a few minutes after the upload. It is not possible to submit the cancellation after the status change.

How much time do I have to upload the according print data before the order gets cancelled?

Normally, the order is cancelled after 7 days of being not processed. There is currently no notification about non-uploaded print data. You are always in responsibility of checking the status from your side.

How are the delivery days for the ordered product calculated?

Each chosen product variant/quantity has a “deadline” mentioned in the Client API according endpoints and StartNOW V3 dashboard.

Looking at a product with a “deadline” of 12:00, which has the following delivery options:

ST (standard delivery): 3-4 days
EX (Express delivery): 1-2 days
ON (Overnight delivery)

*For ST and EX delivery options, if you place the order **before** 12:00:*

Day 0: The same order placement day (day of production)
Day 1 (EX earliest delivery)
Day 2 (EX latest delivery)
Day 3 (ST earliest delivery)
Day 4 (ST latest delivery)

*For ST and EX delivery options, if you place the order **after** 12:00:*

Day 0: The next working day (day of production)
Day 1: (EX earliest delivery)
Day 2: (EX latest delivery)
Day 3: (ST earliest delivery)
Day 4: (ST latest delivery)

For the ON (overnight) option, the delivery is the next day if the order was placed before the deadline (in this case 12:00).

Please note that all mentioned days are the work days to have the right calculation.
